CREATE IMPACT BEYOND IMAGINATION

The PRISMA XL Suite helps Large Format Graphics designers and Print Service Providers (PSPs) to deliver next level print applications every day. To prepare print applications in an easy way and keep control of their print operation for a reliable performance with selected workflow solutions for the Colorado M-series, Arizona flatbed printer family and the Colorado XL-series.

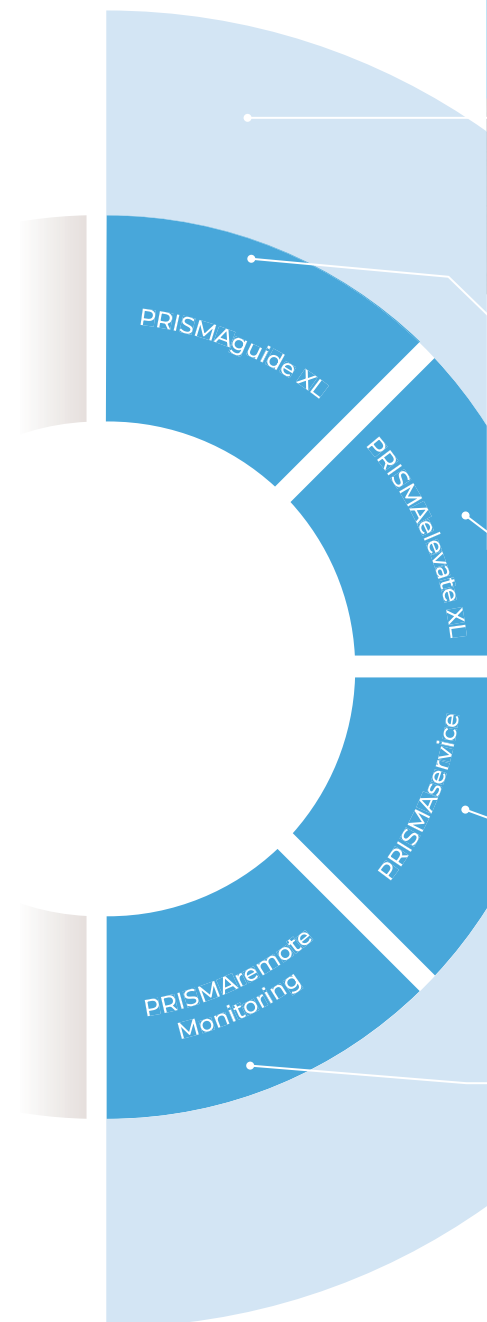

Build on years of expertise

Large-format graphics PSP's are constantly looking for new ways to expand product offering without the need to master complex workflow software.

Print users want to deliver unrivalled and inspiring print applications every day. And want to be better, faster and more creative to meet delivery times and find ways to increase efficiency in prepress: to save time and money and produce effectively.

PRISMA
XL Suite

PRISMA XL Suite

Provides workflow software solutions for large-format graphics PSP's. It helps customers to create breathtaking output and workflow automation with increased added value, intuitive and easy-to-use with higher flexibility with these selected workflow solutions.

PRISMAguide XL

A powerful and easy-to-use design and workflow management application to automate and simplify advanced print job preparation, including multi-layered and doublesided print applications on Colorado and Arizona printers so that print files are ready in an instant.

PRISMAelevate XL

An easy-to-use software application that enables Large Format Graphics designers and Print Service Providers (PSPs) to create tactile print applications and produce outstanding-quality elevated prints up to 4 mm on Arizona printers.

PRISMAservice

Maximise your uptime with a central platform for all service activities. Provide faster, more efficient and more effective customer support. For Canon's Service and Support organisations, self-servicing customers and self-servicing partners.

PRISMAremote Monitoring

A printer tool to monitor your Colorado M-series remotely. The app provides a real-time status of print jobs and tells what action is needed to keep running 24/7.

FIRST TIME RIGHT BEYOND IMAGINATION

PRISMAGUIDE XL

PRISMAguide XL is a powerful and easy-to-use design and workflow management application for large-format graphics print service providers and print producers.

- ➔ **Automate and simplify** advanced print job preparation, including **multi-layered and double-sided print applications**, so that print files are ready in an instant.
- ➔ Benefit from the **intuitive prepress software** that **stores the recipe** for the print-ready file, enabling similar future jobs to be prepared **more quickly and easily** time after time, for **long-term production efficiencies**.
- ➔ PRISMAguide XL assists in the **design, prepress and first time right production** of advanced, high-value print applications on both flexible and rigid media.

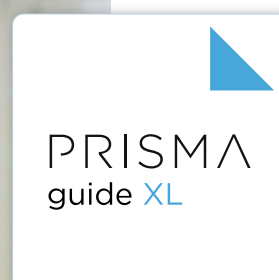

Increase your creativity

PRISMAguide XL helps to simplify job preparation and increase your creativity

From bread and butter to cool and creative. Large-format graphics is all about what your customers want. And they want it all.

On the one hand, you need a productive printer that lets you produce your bread-and-butter applications. Posters, banners and signage for a competitive price.

On the other hand, you need room for innovation and new materials for cool, creative, higher-margin applications that stand out and differentiate you – and your customers – and from the competition.

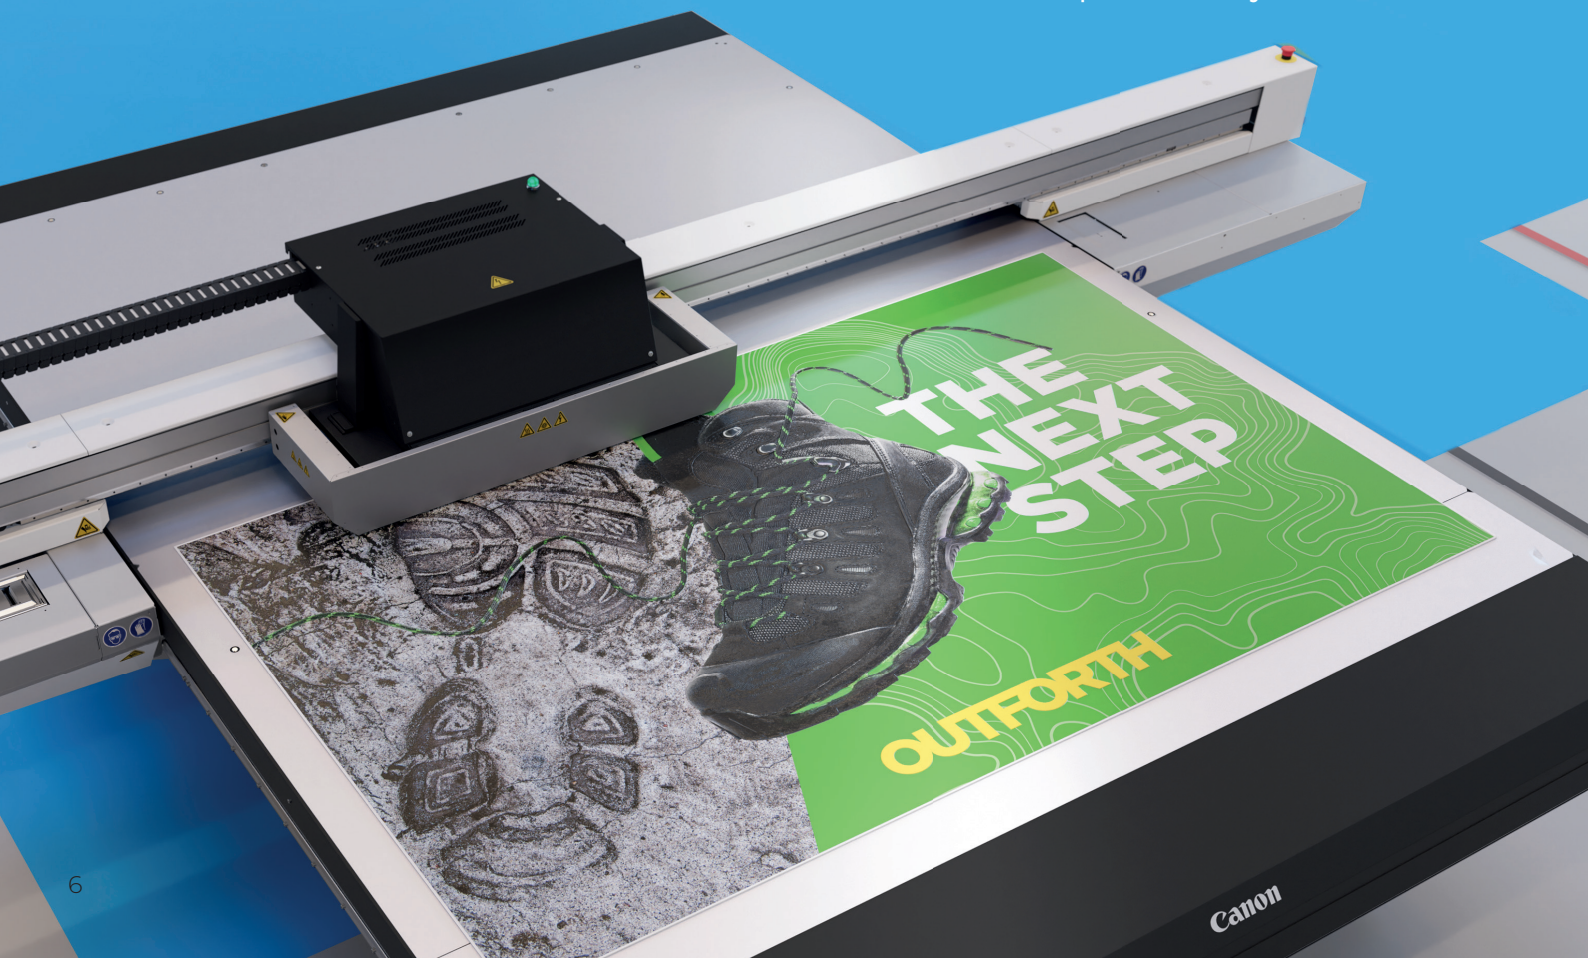

NEW DIMENSIONS BEYOND IMAGINATION

PRISMAELEVATE XL

PRISMAelevate XL is an easy-to-use software application that enables Large Format Graphics designers and Print Service Providers (PSPs) to create tactile print applications and produce outstanding-quality elevated prints up to 4 mm.

- An integrated solution to create high-quality elevated prints simply and reliably, and printed first-time-right.
- With easy-to-use Adobe Photoshop and Illustrator plugins that allows for highly accurate 3D design of elevated print projects without the need for extensive training.
- Simplify design and production of stunning elevated print applications, enabling effortless printing on the award-winning* Arizona flatbed printer family.

Unique elevated prints

Create added value print applications that stand out and add exciting tactile elements that mimic textured surfaces, embossing, metallic accents and raised lettering upto 4 mm.

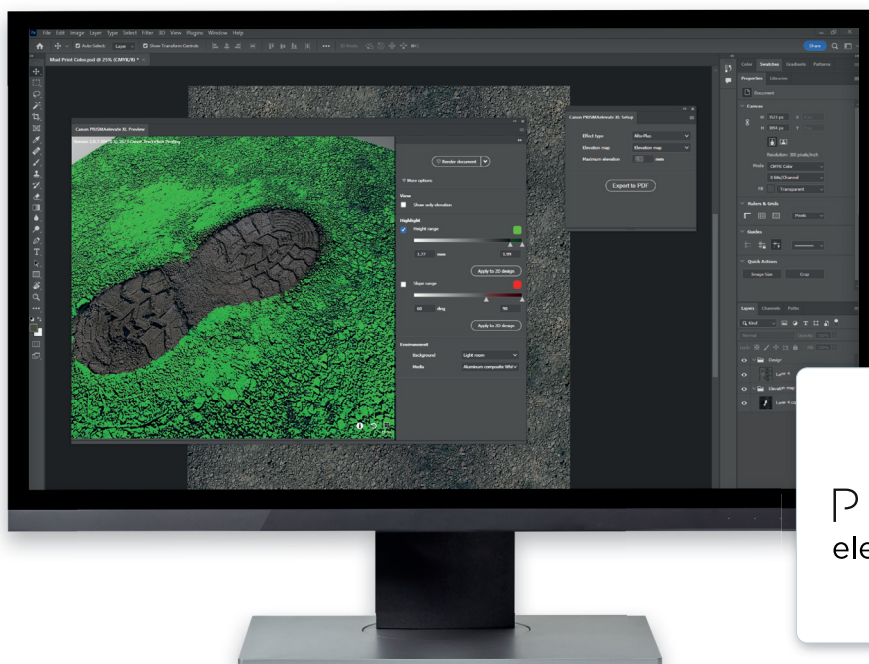

Create high-value applications

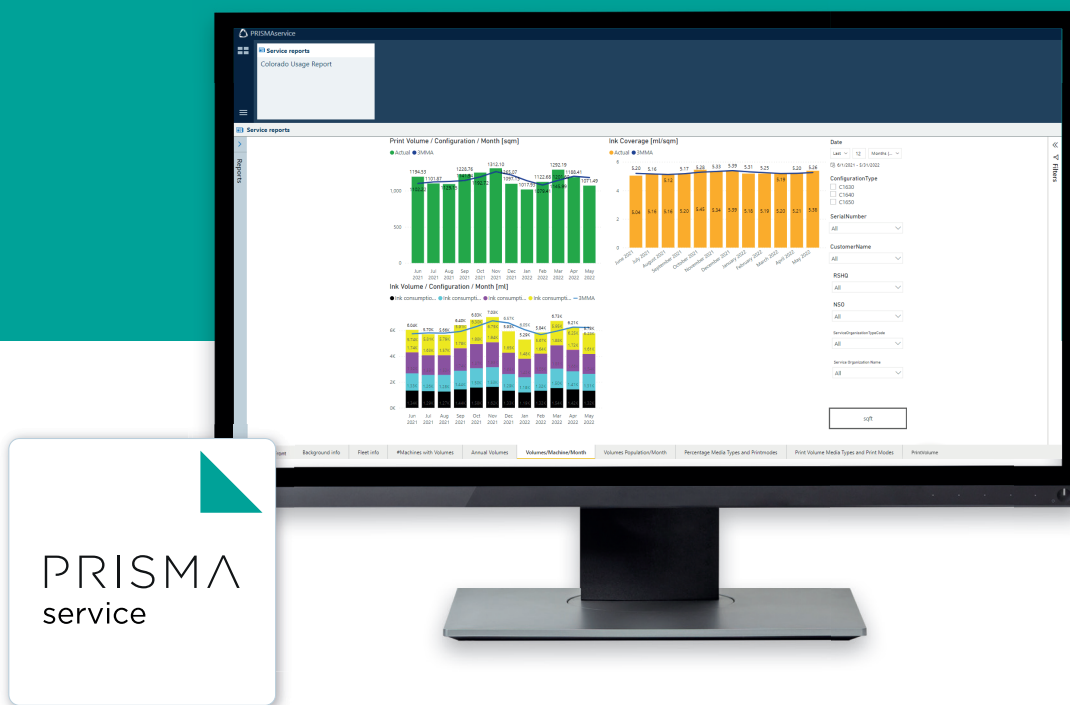

Give print a complete new dimension on rigid substrates like aluminum composite panels, metal foil faced boards and glass to create print applications that stand out.

Open-up new markets

Increase your offering with stunning applications in high-end market segments such as decorative signage, fine art reproductions, braille, interior décor and luxury packaging.

elevate XL

PRISMASERVICE

The central knowledge platform that helps to provide faster, more efficient and more effective customer support.

- ➔ **Provide information and insights** to make performance-critical decisions, for your Colorado M-series, Arizona flatbed printer family and Colorado XL-series
- ➔ Find the **related printer information** based on product type or serial numbers
- ➔ **View and adapt maintenance activities** to prepare service visits and remote service activities
- ➔ Access the **latest service documentation** and modification- and information bulletins
- ➔ **Download** all relevant billing **meter readings** and get updates emailed automatically if needed
- ➔ For Canon's Service and Support organisations, **self-servicing customers** and **self-servicing partners**.

PRISMA REMOTE MONITORING

A printer tool that tightly integrates into your production print operation: with the free PRISMAremote app you can monitor the status of your Colorado M-series on your smartphone, smart watch or tablet at any time and any place.

- ➔ **24/7 insights** in performance of your Colorado M-series printer on a **smartphone or tablet (on-site or off-site)**
- ➔ Provides inside on what's going on, **what action is needed** to keep printer running and **when the current job is finished**
- ➔ When the **PRISMAremote app** is not open, the user will be **alerted through notifications**
- ➔ **No operator presence required** at the printer for **long runs** (UVgel Wallpaper Factory)
- ➔ **PRISMAremote app is free of charge** available for Android and iOS.

Service dashboards

PRISMAservice offers performance monitoring dashboards to help focus on opportunities to reduce costs and improve quality and performance. Access valuable usage and performance data and for preventive and proactive customer support.

Device data insights

Analyze important usage and performance data available per device and installation. Provide insights on toner-, ink- and media usage, service clicks and printer performance.
